

1. NON-administrator, who has NOT YET created a company, logs in as a regular user

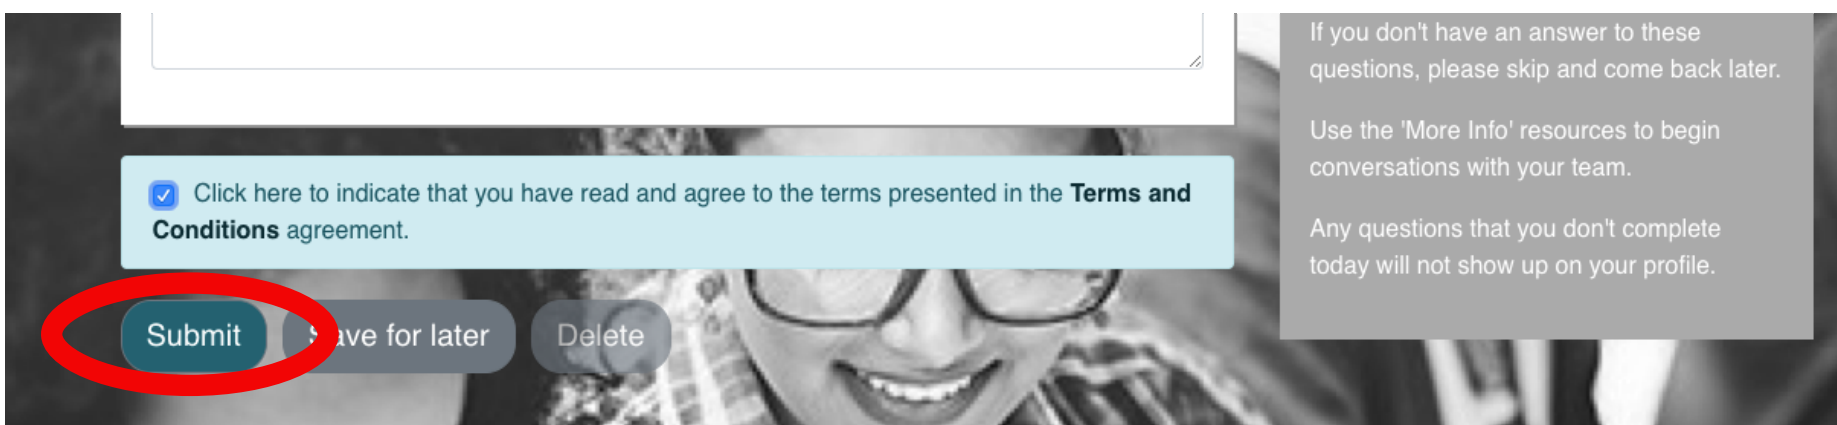

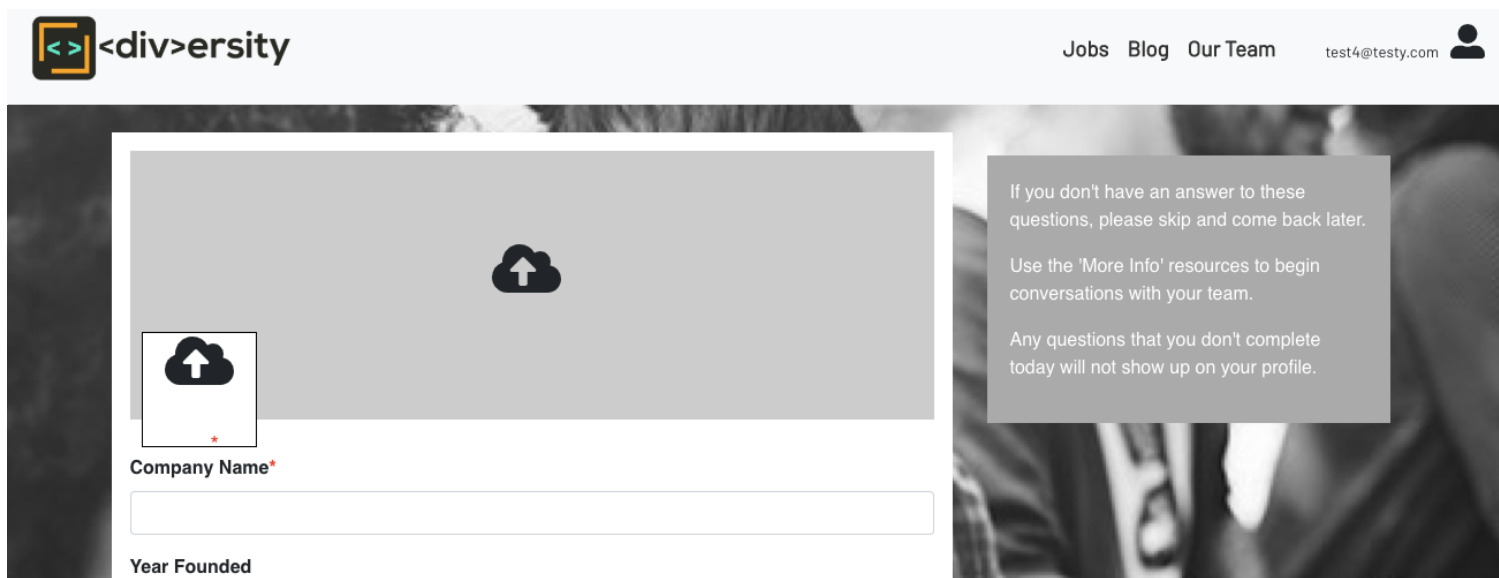

2. User clicks “Create a Company Profile” button. The “What is the size of your company?” modal pops up.

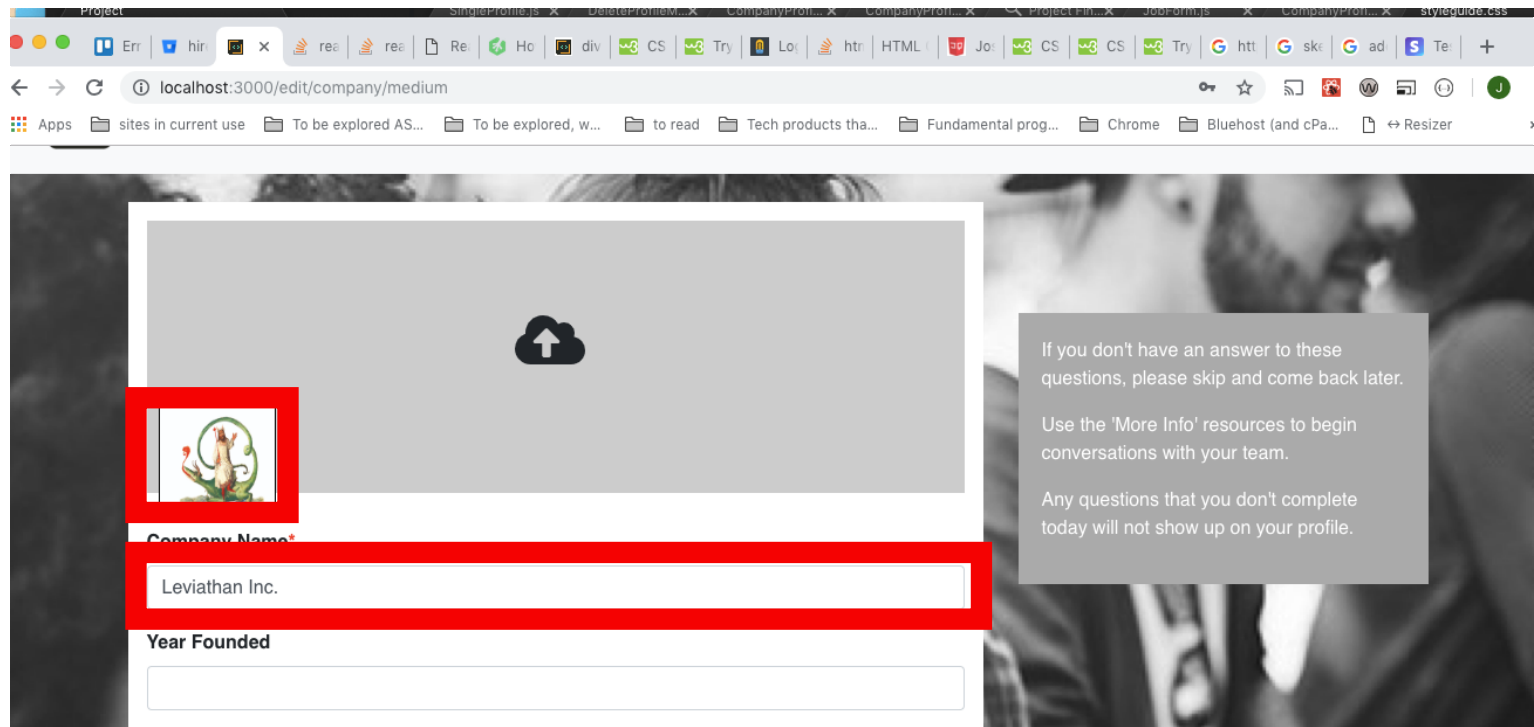

3. User chooses a company size and is directed to the appropriate edit/company page. **NOTE:** User will see the “Post a Job” button, which directs user to pricing page, but user will NOT be able to post job until company has been created.

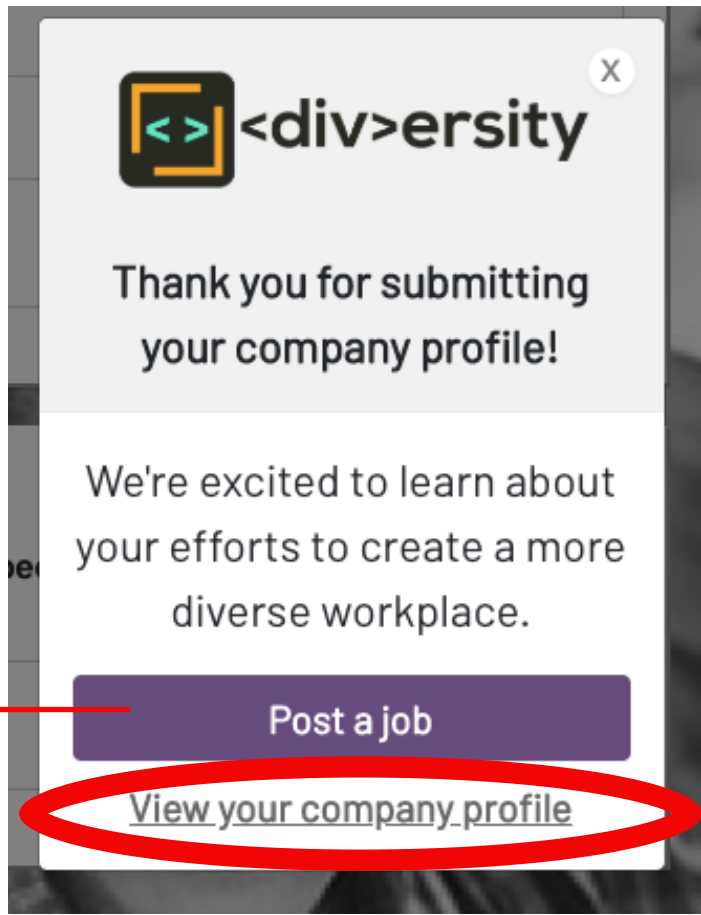

4. User sees blank company form. User fills required fields.

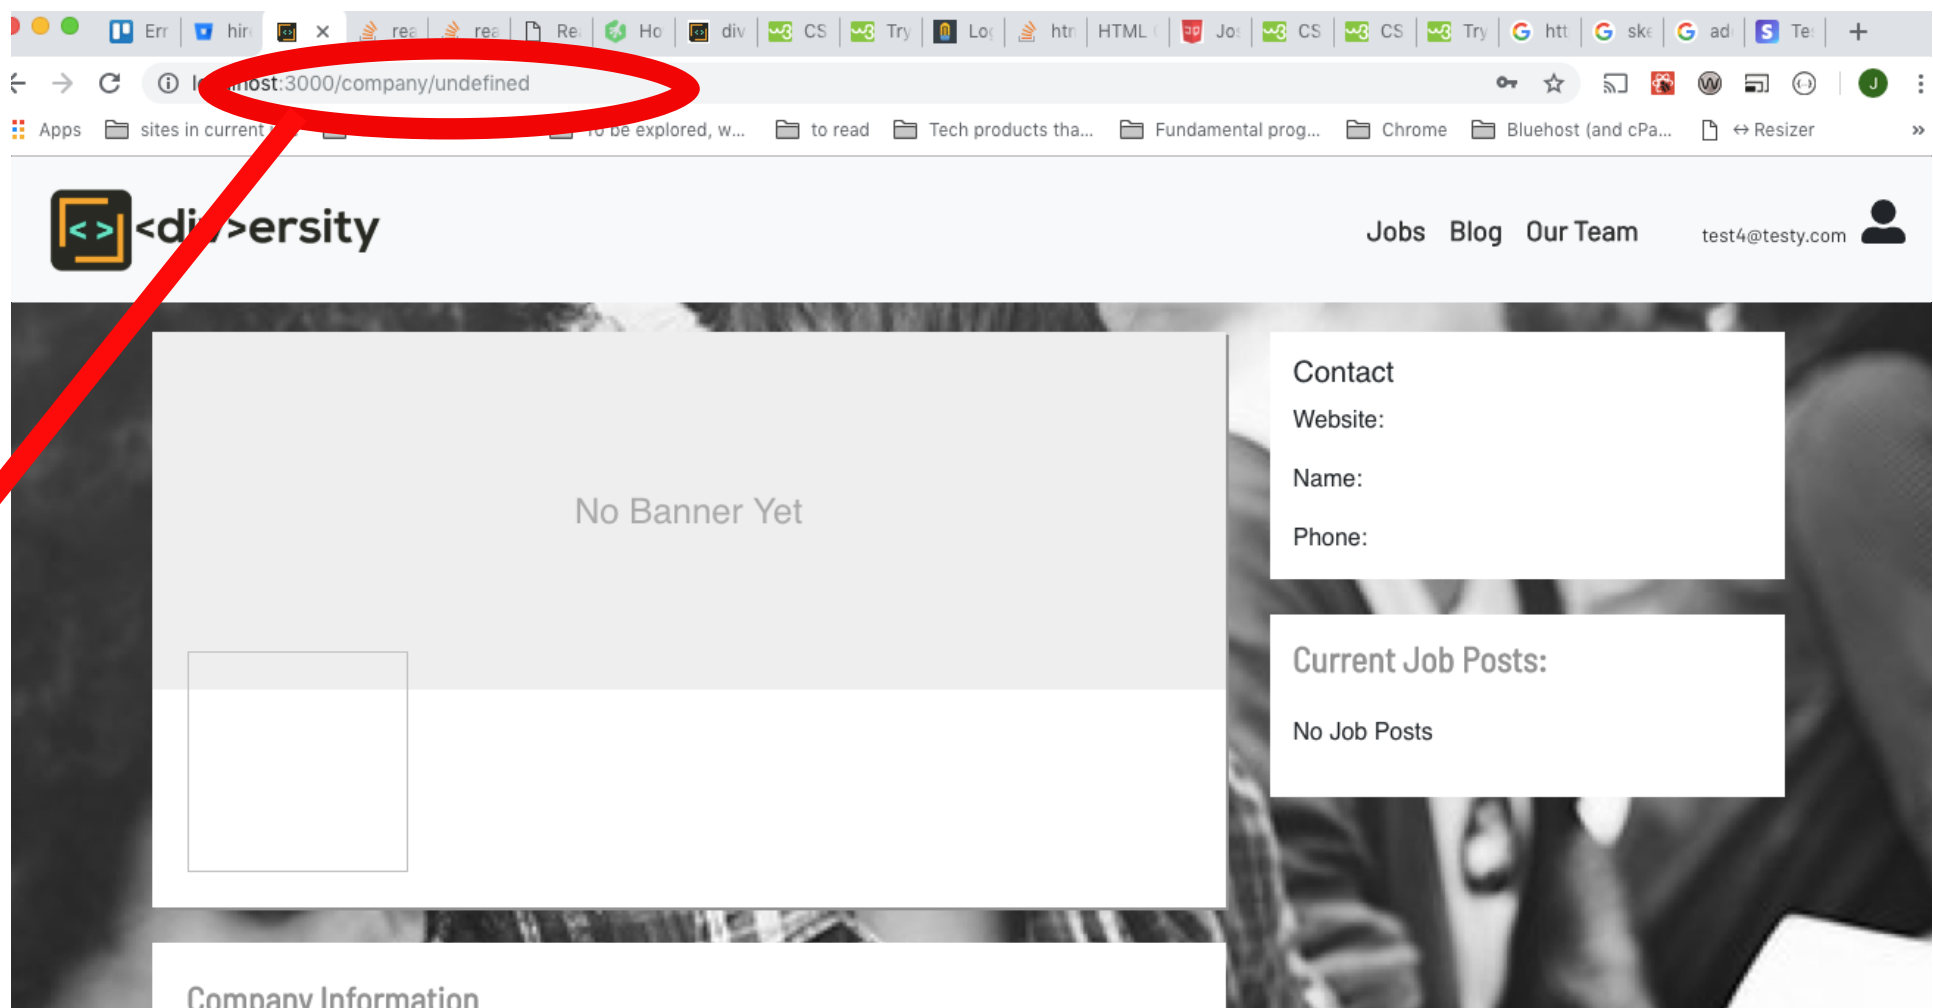

5. User clicks the “Terms and Conditions” checkbox and then clicks the “Submit” button

6. “Thank you for submitting” modal pops up. User clicks on “View Your Company Profile” link. User is directed to an undefined company-profile page.

Directs user to pricing page

7. User does not see their newly created company profile. **NOTE:** The user has simply been directed to the INCORRECT page. If the user goes to home page and clicks on their own company profile, they are then able to access their company profile as normal.
